- Subjects:
- Cinnabar path to the Stone
 - Acetic path to the Stone
 - Niter path to the Stone
 - Circulatum minus
 - Primum Ens
 - Dew research
 - Antimony research
 - Phytopharmaceuticals

The Inner Garden is a collaboration of researchers and practitioners of Alchemy under the aegis of the Elder Brothers of the Rose ✦ Cross. Each member contributes the research results he/she wishes to share for distribution within the group. This results in a symbiosis, in which all members can profit from a shared effort, and the wheel does not need to be re-invented.

The Inner Garden is a Hermetic research group. This means the study results are not freely distributed outside the group. Members are not required to give an oath of silence, but we do value a code of conduct worthy of the Seal of Hermes. We trust that each member will find their personal sense of discretion when it comes to transferring traditional alchemical “secrets” with those outside the group.

Most important prerequisite for joining is an inquiring mind and a willingness to share knowledge.
